
TROY JANSEN BAY

Meycauayan, Bulacan, Philippines • +63 976 056 3152 • tjansenzb2021@gmail.com • linkedin.com/in/troy-bay

BSIT-WMA graduate from FEU Tech with hands-on internship experience spanning UI/UX design and front-end engineering. Proven track record of conceptualizing user-centric designs and personally translating them into seamless, responsive web applications. Backed by mobile development experience and a solid full-stack foundation, I am a collaborative, end-to-end builder ready for immediate, full-time deployment.

CORE SKILLS

- Programming Languages: HTML, CSS, JavaScript, Python, PHP
- Front-End Development: React Native, Tailwind CSS, Mantine UI, Bootstrap, Expo
- Back-End & Databases: CodeIgniter, PostgreSQL, Firebase
- Design & Animation: Figma, Framer Motion
- Tools & Platforms: Visual Studio Code, Git, GitHub
- Professional Strengths: Work ethic, Cross-functional Collaboration, Attention to Detail, Time Management
- Data & Analytics Tools (Foundational / Upskilling):
 - Data Visualization: Power BI, Tableau (Dashboard Design Concepts)
 - Cloud & Data Architecture: Azure Environment (Azure Data Factory concepts), Databricks (Data Lake & Data Warehouse fundamentals)

EDUCATION

FEU Institute of Technology

Bachelor of Science in Information Technology, Specialization in Web and Mobile Applications (BSITWMA)
2022 – Graduation: September 2026

- Status: Completed all academic and internship requirements; Candidate for Graduation.
- Awards: CCSMA Dean's Lister (Bronze) – August 2024 & April 2025.

St. Mary's College of Meycauayan City

Senior High School – Science, Technology, Engineering, and Mathematics (STEM) Track
2020 – 2022

SEMINARS & TRAININGS

- *Build with AI Manila 2026: Next-Gen Builders!* | April 25, 2026
- *Build with AI Manila 2026: Beyond the Prompt* | April 11, 2026
- *UI/UX Webinar* – FEU Institute of Technology | March 6, 2023
- *Photoshop Essentials (Wave 8)* – Phixels PH | May 15, 2022

PROFESSIONAL EXPERIENCE

Simplevia Technologies Inc.

Web Development Intern (Front-End)

January 19, 2026 - July 1, 2026

- Collaborated with a cross-functional development team to build and optimize user interfaces for internal software systems.
- Translated Figma design mockups into production-ready frontend code using TailwindCSS and Mantine.
- Followed organized file structures and component-based design architecture to maintain code consistency across application modules.
- Utilized Git and GitHub for version control, code management, and team workflows.
- Tested and optimized applications to ensure cross-browser compatibility.

KEY PROJECTS

TourISLA | *Project Manager & Mobile Developer*

- Co-developed a comprehensive web and mobile platform that features full-stack management tools for administrators, local businesses, and visitors. The system includes an interactive digital map showcasing various locations, allowing users to select attractions and seamlessly redirect to Google Maps for turn-by-turn routing and real-time navigation. For visitor management, it utilizes a dual-layer registration portal integrated with PayMongo for fee processing, alongside a secure QR-code scanning module that on-site staff use to verify and track visitor demographics at tourist spots. Operations are managed through an automated admin accreditation workflow for tour operators and guides, which includes manual/online payment verification, lifecycle tracking, and Google Calendar synchronization for scheduling. Additionally, it includes an announcement system for safety advisories, emergency incident reporting logs, and a digital archive dedicated to preserving local cultural media.

ECO-Cool | *UI/UX Designer*

- Designed a fully working high-fidelity website prototype and interactive user flows in Figma for an eco-friendly product and reforestation platform. The interactive mockup details user paths for browsing and purchasing mini fans with seed pockets, customizing seed-planting choices, and opting to donate seeds directly to environmental NGOs. Additionally, the interface features a map tool for locating NGO-verified planting areas and a dedicated tracker page to visualize personal donation contributions toward reforestation efforts.

Tipsy Tavern | *Frontend Developer / Member*

- Developed a responsive liquor retail website using HTML, CSS, and JavaScript as part of advanced web design coursework. Built key features including a functional add to cart system for selecting and purchasing products, alongside a custom dark mode toggle to enhance user interface customization.

FEU TECH Borrowing System | *Developer*

- Developed a dedicated equipment management and asset tracking web application using the CodeIgniter PHP framework. The system consists of four distinct modules: an on-demand "Borrow" module for immediate device acquisition, a "Return" module to process device collection and keep inventory updated, a dedicated "Reservation" feature allowing associates to book specific items in advance, and a comprehensive "History" log to track borrowing timelines and maintain equipment accountability.

TICAP 20 Certification Design

- Designed the certification for TICAP(Technology Innovation in Capstone Project) 20 Awards Night for FEU Tech and FEU Diliman using Canva and Photoshop

CERTIFICATIONS

- IT Specialist (Certiport): JavaScript (2025), HTML and CSS (2024), Python (2024), Networking (2024)
- PMI Project Management Ready – Project Management Institute (2025)
- DevNet Associate – Cisco (2025)
